Abstract

As a manifestation of the elaboration of the Tri Dharma of University, Community Service Activities have been carried out in the Nurul Islam Mosque Development Implementation program, which is located in Kp. Situpete RT. 01/06 Kel. Sukadamai Kec Tanah Sareal Bogor City. The main objective of this activity is to assist residents in the construction of the Mushola in the form of technical consultation assistance during construction. As time goes by, many changes have occurred to the condition of the mosque, which is becoming more and more obsolete. Currently, there is physical damage to the mosque building due to age, and it needs to be renovated because in some parts, such as the roof damaged or decayed wood, the ceiling condition has been damaged a lot due to leaks by rainwater during congregational prayers and the arrival of the holy month of Ramadan for congregational tarawih prayers is worried that when it rains it can cause leaks. This condition causes the implementation of worship to be less solemn and uncomfortable. Conditions like this have led to the desire to renovate the facilities and infrastructure of the mosque so that it can carry out its function as a place of worship and a place for fostering the morals of the people. A representative mosque, directly or indirectly, will find it easier to carry out its functions. This condition has inspired the Nurul Islam Mosque congregation to provide a place of worship that is more comfortable and capable of guiding the people. In the Qur'an Karim, the letter At Taubah verse 18, ALLAH SWT says: "that only those who believe in Allah and the Last Day will prosper Allah's mosques." The Prophet said, "Whoever builds a mosque, Allah will build a house in heaven" (HR. Bukhari and Muslim). This rationale drives us as the committee for the renovation of the Nurul Islam Mosque to invite all parties to realize this desire jointly

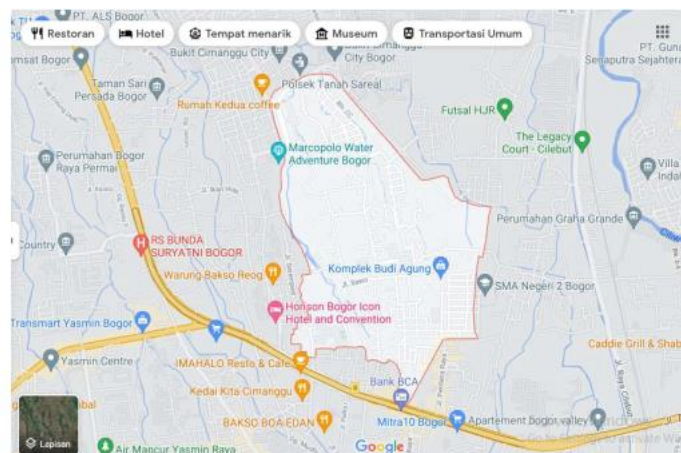

Keywords: Renovation, Musholla, Nurul Islam, Supervision,

INTRODUCTION

The growth of Muslim awareness of the importance of mosques/mosques as a central place for all activities related to religion and community in these times becomes like mushrooms that grow in the rainy season. Only the meaning of the construction of mosques/mosques in some people is still identified only as a place of spiritual worship or routine activities to Allah SWT by side by the side of Hablumminannas. Education people as Lecturers of Mpu Tantular University are present in order to carry out Tri Darma College for education, research, and community service by providing assistance, education, and supervision of the process of deliberation, planning, development, and supervision with the primary objective that the quality of musholla development expected by the community meets good quality standards, development takes place with the gotong-royong system by the community then the role of mentoring is to facilitate community ideas about the form of buildings, material quality, implementation time, budget, and funding sources, the basic idea of building forms becomes the primary key as a joint means that will be used in a long enough time so that the form must accommodate advice and input from various community groups while still paying attention to the primary function of worship facilities.

The use of materials from the initial plan of the one-story building to two floors with various considerations resulted in changes in materials for the structure (foundations, columns, beams, and floor plates), architecture in the form of visible changes, lighting, window sills, sanitair, use of floor materials, type of plapon and others while for MEP (mechanical, electrical, plumping) must adjust according to changes in structure and architecture with the addition of light points and air conditioning coolers, to have an impact on the longer implementation time and changes to the Budget Plan by the conditions and agreements of all residents as owners of musholla buildings.

Geographically Musolla Nurul Islam is located at Kp. Situpete RT. 01/06 Kel. Sukadamai Kec Tanah Sareal Bogor City is between $6^{\circ}30'30''$ - $6^{\circ}41'00''$ South Latitude and $106^{\circ}43'30''$ - $106^{\circ}51'00''$ East Longitude. The house of H. Aslih borders the North, the East borders the South Village Road bordering Khoerudin Land, and the West borders the H. Sabirin land. Area of Kel. Sukadamai: 112 Ha or 0.0595% (1882 H) of the entire district area of Tanah Sareal consisting of 12 villages. Kp Situpete itself covers an area of 8.6. Ha or 0.0768% of the total area of Sukadamai Village is located at an altitude of 190 m-330 m from sea level. Musholla Nurul Islam is located in Kp. Situpete RT. 01/06 Kel. Sukadamai Kec. Tanah Sareal Bogor City was built in 1993 on waqaf land area of 86 and a building area of 64 m². This muscle is routinely used to organize educational activities (TPA, Majelis Ta'lim), Organize Routine Studies, Organize Islamic Da'wah / Tabliq Akbar, Organize Islamic Day Activities and Organize Fardhu Prayer.

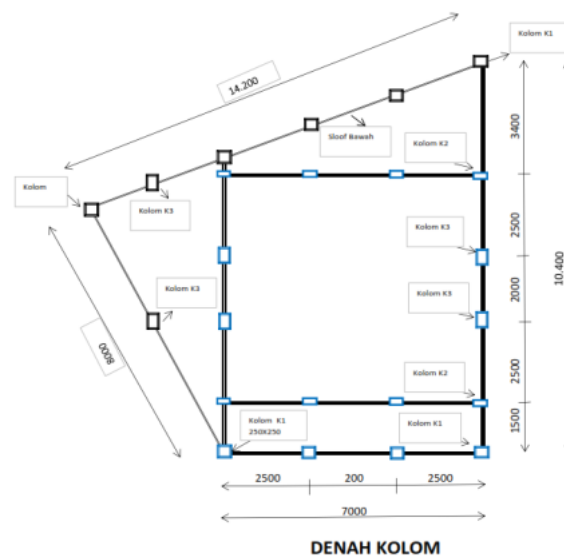

Gambar 1. Peta Lokasi Kp. Situpete

Currently, Musolla Nurul Islam is located in Kp. Situpete RT. 01/06 Kel. Sukadamai Kec. Tanah Sareal Bogor City can only accommodate about 70 pilgrims, while currently, the number of pilgrims has reached 100 pilgrims. Musolla Nurul Islam is currently felt too small and already uncomfortable. Because every year there is a tendency for the number of pilgrims to increase, the Takmir Musholla Nurul Islam seeks to complete the facilities and infrastructure that support it. One of them is a plan to renovate the musolla, which was initially a simple building to be more feasible that

has a public bathroom. It is expected that the optimal infrastructure will support the process of religious activities and learning then to meet the needs of pilgrims in the renovation of musholla.

Gambar 3. Denah

The shape of the musholla and the floor plan seen in figure 2 and figure 3 results from the assistance of discussions between the board and the citizens of the community so that there is an agreement of the floor plan and the form of Musholla Nurul Islam. This community service activity aims to assist in the construction of Musolla Nurul Islam located in Kp. Situpete RT. 01/06 Kel. Sukadama Kec Tanah Sareal Bogor City becomes a representative building in terms of security and comfort so that religious processes and learning activities in landfills can run more conducive and effectively

METHOD AND PROCEDURES

The initial stage of devotion to the community is in the form of demolition of existing musholla. At this stage, the community team will begin the development work by dismantling and making a bow plank.

Figure 4. Demolition of old building towers

The second stage is to take site measurements, foundation excavations, foundation installation, aloof, and columns so that the design can match the conditions in the field.
